

Silage film, silage protection & crop packaging

harvest INTERNATIONAL® wickelfolie – stretch wrap

- 7 layers blow film
- guaranteed runnage
- excellent tensile strength and puncture resistance
- allows for a high pre-stretching ratio of up to 80 % (up to 70 % recommended)
- extraordinary adhesion and perfectly sealed bales
- perfectly suited for wrapping round and square bales on all popular bale wrappers
- UV-resistant: 12 months (Northern and Central Europe)
- excellent adhesiveness
- best colouring and opacity of the film
- suitable for all popular bale wrappers
- efficient plastic core

Better safe than sorry!

harvest INTERNATIONAL® barrierefolie – oxygen barrier film

- high-quality barrier film, 75 µ, black / white
- coextruded 9-layer film
- elasticity: lengthwise 750 %, crosswise 800 % (ASTM D882)
- oxygen permeability: 0 - 10 cm³/m²/24 h (DIN 53380)
The combination of various layers of high-quality plastic as well as the EVOH layer (etyhlen-vinyl alcohol-copolymer) enclosed within ensures an extremely high oxygen impermeability!
- easy to handle due to low weight
- environmentally friendly, fully recyclable
- 12 months UV-resistance

Special width and length available on request.

Extremely oxygen-tight!

harvest INTERNATIONAL® rundballennetz – net wrap

- high-quality net wrap suitable for all popular round balers
- available in all popular widths and lengths
- **guaranteed runnage**

	guaranteed runnage	minimum weight
harvest INTERNATIONAL® 2000	2000 m	22.5 kg
harvest INTERNATIONAL® 3000	3000 m	32.0 kg
harvest INTERNATIONAL® EXTRA 3000	3000 m	33.5 kg

harvest INTERNATIONAL® EXTRA 3000 round bale net offers a guaranteed runnage of 3000 m and is suitable for all common presses with a 130 cm net mounting.

harvest INTERNATIONAL® bindegarn – twine

- high standard baler twine
- available for all large square balers
- excellent tensile strength even inside the knot
- XL – **guaranteed runnage**

Other sizes available on request.

harvest INTERNATIONAL® siloschutzgitter – silage protection net

- 220 g/m², green
- guaranteed UV-resistance: 7 years
- contains handles for easy handling
- carefully seamed at the edges
- label of size sewn into all 4 corners

Protects the forage

from damages caused by crows and other birds, game and livestock, storm and hail

Keeps the film from

fluttering or „pumping up“

Improves

the protection of the silage's quality and the silo's visual appearance

harvest INTERNATIONAL® silosack – silage gravel bags

- tie cord is woven into the fabric
- handles are incorporated into the fabric
- sturdy selvedge
- solid, high quality monofilament fabric
- guaranteed UV-resistance: 7 years

For optimum filling use gravel instead of sand!

- gravel does not absorb water
- stays ductile, durable and flexible
- gravel does not congeal at low temperatures and will not be washed away by rain
- easy to handle if filled loosely (filling mark at 75 %)
- adapts very well to the silo's uneven surface
- fill with grit (grain size 0/8) without sand, do not use stone chips

Packaging

Delivered individually wrapped in transparent bags and on EUR-pallets, excellent storability and transportability.

harvest INTERNATIONAL® unterzugfolie – cling film

Stability after opening

- transparent, three-layer PE film
- adapts perfectly to the silo's uneven texture
- reduces oxygen permeation after opening

harvest INTERNATIONAL® silolack – silo varnish

- contains high vacuum bitumen (HVB)
- ring and ball softening point: 100 °C
- the solvent is purified and phenol-free
- no contamination of the forage with coating residues (as it will not stick to the varnish)
- provides a non-sticky surface
- resistant to forage acids
- food-safe, therefore suitable for drinking water reservoirs
- consumption: approx. 1 litre per 5 m² for two coatings
- apply evenly using paint brush/roller (drying time approx. 1 hour); use white spirit for cleaning, **surface must be dry and clean**
- mix varnish with white spirit or universal thinner if you're using airless sprayers
- spray test area to determine the right mixture resp. the nozzles and pressure required

*available as
200 litre barrel
or 30 litre
bucket*

harvest INTERNATIONAL® folienklebeband – adhesive film tape

Adhesive film tape for repairing damages to silage bales or silage film. available in:

- white
- light green
- black

Distributor:
