

Stretchfilm

For many years, jbs has been continuously successful in distributing **DUO PLAST** stretch film.

DUO PLAST stretch film continues to be the only agricultural stretch film which is manufactured completely without adhesive using a state-of-the-art blow extrusion process which makes it **100 % food safe!**

	green	white	black	olive
750 × 1500 m	x	x	x	x
500 × 1800 m	x	x	x	x

Other sizes available on request

This film can provide you with a lot more performance and safety. Why is that?

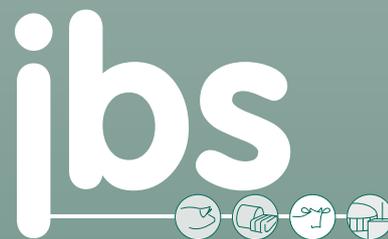

- **real runnage** guaranteed!
Depending on the competitor's product, this alone will get you up to one more wrapped bale per role of film!
- highest efficiency – may be pre-stretched to up to 80 %
- smooth (non-adhesive) on the outside

Advantages of DUO PLUS

- ensures low noise wrapping – even if you are working late or close to residential areas!
- film does not telescope on the core!
- if stored correctly, the bales can be stocked for a significantly longer period of time, as the film is manufactured without adhesive.
- film is wrapped onto cardboard cores, which are sealed on both sides to protect them from getting wet; this core is both easy on the environment and easy to dispose of!
- no contamination of pre-stretch unit!
- bales are wrapped **100 % food safe!**

In addition, this film shows all the quality characteristics of a premium product

- guaranteed UV-resistance: 12 months
- coveringly dyed
- can be delivered at short notice during harvest time.
- huge range of widths, colours and running lengths available!
- ideally suited for wrapping square and round bales due to its special manufacturing process and the unique formulation!

growth & success
for the best agriculture – worldwide

At a glance

- real runnage guaranteed
- highest efficiency
