

# DUO PLUS XL

## The next generation of agricultural stretch film

Distinguished mechanical properties in all harvesting conditions

### Real runnage guaranteed!

- provides at least the runnage stated on the packaging
- shortens the setup time, thus increasing the productivity!

### Not pre-stretched during manufacture!

- thus **fully** retaining the increased pre-stretching options customary for **DUO PLAST** films
- may be pre-stretched to up to 80 %!

### Tidy!

- no adhesive residues on pre-stretch unit or bales!
- thanks to their smooth exterior, the bales are instantly ready for transport!

### Advantages of DUO PLUS XL

- coveringly dyed
- if stored correctly, the bales can be stocked for a significantly longer period of time, as the film is manufactured without adhesive
- 12 months UV-resistant – guaranteed!
- ensures low noise wrapping – even if you are working late or close to residential areas
- smooth (non-adhesive) on the outside
- film does not telescope on the core!
- film is wrapped onto cardboard cores, which are sealed on both sides to protect them from getting wet; this core is both easy on the environment and easy to dispose of!
- can be delivered at short notice during harvesting season

### Perfectly suited for all types of machinery!

For round or square bales, stand-alone machines or combinations, Göweil or Autowrap ...

**XL**  
provides  
extra runnage,  
10 % more film per roll!

**We recommend wrapping 6 layers  
in order to increase quality – safety – profit!**
